UPPF STUDIO

Window Tint Aftercare & Cure Time

To ensure the best results and longest life of your tint, please follow these aftercare instructions:

Thank you for choosing UPPF Studio for your window tint installation.

First 3–5 Days

Do not roll down your windows** unless specifically advised otherwise.
* Small water bubbles, haze, or a slightly cloudy appearance are **normal** during curing.

Avoid touching or pressing on the film.

Cure Time

Typical cure time is **3 to 7 days** depending on weather.
* In colder or humid conditions, full cure may take **up to 2–4 weeks**.

Once cured, the tint will become clearer and fully bonded.

Cleaning Instruction

* Use a **soft microfiber towel**.
* Use ammonia-free glass cleaner only.
* Avoid abrasive pads, brushes, or harsh chemicals.

Normal During Cure

You may notice:

* Water pockets
* Light haze
* Minor distortion

These usually disappear as the film dries.

If You Notice Issues

If large bubbles, peeling edges, debris concerns, or anything unusual remains after cure time

Please contact UPPF Studio so we can inspect it and make it right.

Enjoy your tint

Enjoy your new look, privacy, and heat rejection from your tint.

Thank you for your business
